

**Document Name:** Release Plan

**Product Name:** Wabi-Sabi

**Team Name:** Wabi-Sabi

**Revision Number:** #1

**Revision Date:** 07/01/2019

### **High Level Goals:**

- 1) Build a minimalistic and simple to use ecommerce site that specialises in the sale of second hand clothing.
- 2) Scrape the web to gather data on average prices of second hand clothing on sites like ebay and craigslist.

### **User Stories For Release:**

- 1) As a user, I want a website that is easy to navigate.
- 2) As a user, I want to be able to create an account.
- 3) As a seller, I want to be able to list items on the website.
- 4) As a seller, I want to be able to upload pictures of my items.
- 5) As a buyer, I want to be able to search for items.
- 6) As a buyer, I want to be able to purchase items.
- 7) As a user, I want to know the average price of the item for sale.
- 8) As a collector, I want to know how rare an item is.
- 9) As an investor, I want to know historical prices for an item to analyse future prices.

### **Product Backlog:**

- 1) As a buyer, I want to be able to leave reviews for a seller so that others know about my experience.
- 2) As a seller, I want to be able to receive reviews so that people are more likely to trust me.
- 3) As a user, I would like to be able to run the site as a mobile app.
