

Sprint2 Report by Wabi-Sabi, July 15th,2019

Action to stop doing: Less Scrum meeting.

Action to start doing: Our team can make more discussions online. Not only during the meetings with TA and weekly Scrum meetings, also can have more communications during the weekend. Hence, the team members can help each other and build our project soon.

Action to keep doing: All the team members are taking their responsibility very well for the assigned tasks. We are on the right track to finish our project.

Work completed/not completed:

- As a seller, I want to be upload pictures of my items
- As a buyer, I want to be able to search for items
- As a buyer, I want to be able to purchase items

Our team completed all the user stories which we made for the sprint2. For the additional working, we are going to keep working on the styling to make our webpage more decently.

Work completion rate: Our team completed 100% of our Sprint2 Plan. Each of tasks was finished in the estimation time.
