

Xiaobin Wu

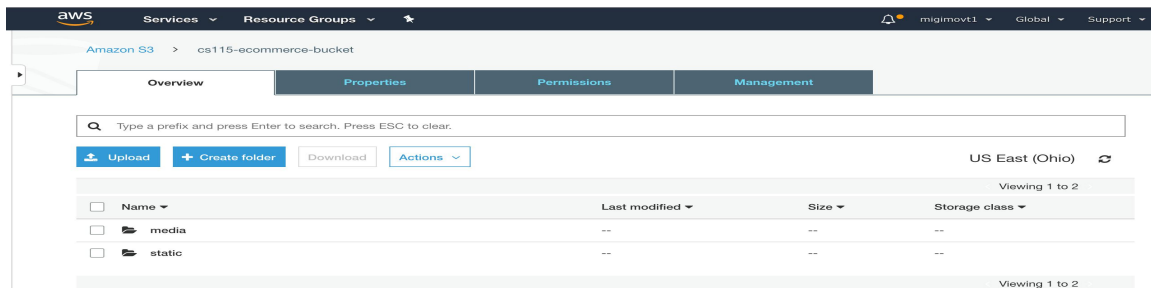

## AWS Cloud/Heroku

I uploaded our products to the AWS cloud, and worked with Duy to make our website become lives by using Heroku. Additionally, I reformed the U/I for the checkout webpage and selling page for each products. Also, being the sprint2 scrum master.

All the products are storage well in the AWS and our website runs well.

AWS account: mgimovt1

AWS S3 bucket name: cs115-ecommerce-bucket

- AWS in Django: src/ecommerce/aws/conf.py

Setup connection with AWS

- src/ecommerce/aws/utils.py

The folders in the AWS S3 bucket

Heroku user e-mail: xwu63@ucsc.edu

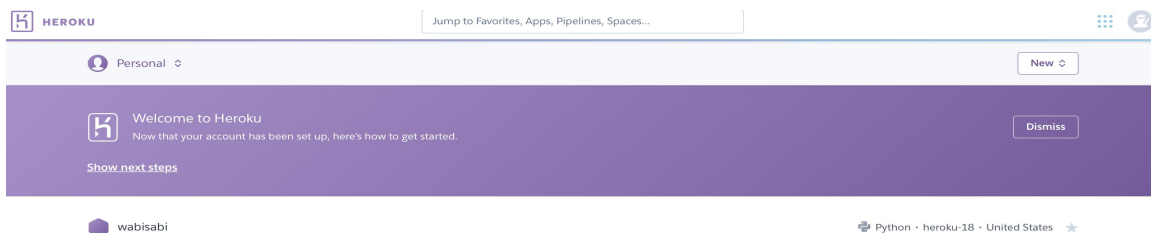

Heroku bucket name: wabisabi

Heroku in Django: src/ecommerce/settings/production.py, Line25,26:

```
ALLOWED_HOSTS = ['.herokuapp.com']
```

```
EMAIL_HOST_PASSWORD = os.environ.get('EMAIL_HOST_PASSWORD')
```

This code setup the link with Heroku
